PIG CROP REPORT

SEPTEMBER 1963

The number of hogs and pigs on farms in the 10 Corn Belt States on September 1, 1963 totaled 51,178,000 head, according to the Crop Reporting Board. This is an increase of 2 percent from the 50,398,000 head on farms a year earlier, and 2 percent more than the 50,345,000 on hand September 1, 1961. The 10 States in this report are Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, South Dakota, Nebraska, and Kansas.

Inventory numbers on September 1 compared with a year earlier were larger in 7 of the 10 States. Indiana and Missouri were each up 1 percent; Iowa and South Dakota, each up 2 percent; Nebraska, up 3 percent; and Illinois and Kansas, each up 4 percent. Inventories in Ohio on September 1 were the same as a year earlier. Decreases in the 2 remaining States were: Minnesota, 2 percent; and Wisconsin 3 percent.

The number of hogs and pigs used or to be used for breeding in the 10 States totaled 6,527,000 head, or 12.8 percent of all hogs and pigs on farms September 1, 1963. Other hogs and pigs totaled 44,651,000 head or 87.2 percent of all hogs. By weight groups, the number and percentage of the total in each weight group are: Under 60 pounds, 16,008,000 head or 35.9 percent; 60-119 pounds, 11,899,000 head or 26.6 percent; 120-179 pounds, 10,477,000 head or 23.5 percent; 180-219 pounds, 5,271,000 head or 11.8 percent; and 220 pounds and over, 996,000 head or 2.2 percent.

JUNE-AUGUST PIG CROP

The June-August 1963 pig crop in the 10 States totaled 17,504,000 head. The pig crop reported for these States is the number of pigs from litters farrowed during June through August that are still on hand or have already been sold. No comparisons are available with earlier years.

The number of sows farrowing totaled 2,420,000 head, 2 percent more than a year earlier and 7 percent more than the 1957-61 average of 2,257,000 head. Increases were reported for all States except Missouri, Indiana, and Kansas. On June 1, 1963 farmers in the 10 States reported intentions to increase June-August 1963 farrowings by 3 percent. Of the sows farrowing during this period, 792,000 farrowed during June, which was 9 percent more than the 727,000 head farrowed during June 1962. The number of sows farrowing in July 1963 was 725,000 head, 11 percent more than the 654,000 head a year earlier. During August 1963 the number of sows farrowing, at 903,000 head, was 9 percent less than the 995,000 head farrowed during August 1962.

SEPTEMBER-NOVEMBER FARROWINGS

Sows bred and intended for farrowings in September, October and November totaled 2,207,000 head, 3 percent less than a year earlier, but 11 percent more than the average. Decreases from a year earlier were indicated in 7 of the 10 States, ranging from 2 percent in Iowa to 7 percent in each Minnesota and Missouri. Ohio and Nebraska show no change from a year earlier, with South Dakota the only State showing an increase for this period. Expected farrowings by months are 1,125,000 sows in September, 672,000 in October, and 410,000 in November. The September 1 intentions for the September-November period are 3 percent less than the intentions reported for this period on June 1, 1963.

DECEMBER-FEBRUARY INTENTIONS

Reported breeding intentions indicate 1,813,000 sows to farrow during the December 1963-February 1964 period in the 10 States. This is 1 percent less than a year earlier but slightly more than the 1957-61 average. Five of the 10 States indicated increases from a year earlier as follows: 5 percent in each Iowa and Kansas, 8 percent in Nebraska, 10 percent in Ohio; and 12 percent in South Dakota. Expected decreases are 5 percent in Indiana, 6 percent in Illinois, 8 percent in Minnesota and 10 percent in Wisconsin.
